

Welcome to RedBog Renewables

Our Services:

We want to take on the day-to-day running of your green technology.

RedBog Renewables provides quality expertise in three key service areas. We provide a full suite of services to our customers with 24/7 support with our technical team and long lead time project development.

Asset Management:

- Our team deploy, operate, upgrade and integrate your renewable energy assets.
- We aim to get the best performance from your Wind, Solar or Hydro technology.
- Round the clock technical analysis, leading to increased and improved revenue and energy output.

Maintenance:

- Structured maintenance programmes, built into the life-cycle of Wind and Solar farms.
- Scheduled inspections identify and mitigate essential repairs and large-scale overhaul
- Qualified and experienced team of engineers ensure continued care of valued assets.

Design Retrofit:

- Upgrade your technology to maximise energy output and operational effectiveness.
- Advanced design and control technology, proven to increase return on investment.
- Leading work, alongside manufacturers to develop valuable solutions.

Our Technology:

RedBog Renewables provides quality expertise in three key green energy areas. Our team have experience working with the worlds leading manufacturers, designers and providers of wind turbines and solar farms.

Wind Energy:

- Provides 85% of Irelands Renewable Energy
- An established and effective source of power.
- Experienced in both onshore and offshore wind turbine and farm development and management.

Solar Power

- A growing source of power in Ireland
- Clean and cost efficient energy
- Specialist services in large scale consultation and deployment of solar farms.

Hydro:

- Reliable and low-maintenance energy option.
- Micro-scale and large-scale modern deployment possibilities
